

Safe AI. Anywhere.

On-device data protection for every AI interaction.

WHO WE ARE

Jason Melo

Two-time unicorn founder. CEO, PrivacyPal.

BACKED BY

Fastweb + Vodafone

PARTNER

NVIDIA Inception

TRACTION

10M+ records scanned and protected

FEATURED

Plug and Play Silicon Valley Summit — 4,000 attendees

We didn't build a feature. We built an architecture.

PLUGANDPLAY

RECORDS. PROTECTED.

Does your team use ChatGPT? Do you know what they're pasting into it?

Every prompt is a data event.

Customer PII

Financial records

Health data

Source code & API keys

Proprietary strategy docs

Your firewall can't see it.

Your DLP can't stop it.

It's happening right now.

THE GOVERNANCE GAP

10+ AI agents are already in your environment. Nothing governs the space **in between**.

You can't safely implement AI until one layer sits between your data and every model — governing each interaction end-to-end, from data privacy to controls to usage audit.

The question isn't whether to use AI. It's **who's governing it**.

2026: CISA + 5 intelligence agencies issued a joint advisory warning about exactly this gap.

THE OLD APPROACH

The old approach kills the output.

INPUT · TRADITIONAL DLP

Prepare a financial summary for ~~{CLIENT-NAME}~~ showing Q3 revenue of ~~\$4.2M~~

OUTPUT · WHAT THE AI SEES

Prepare a financial summary for [REDACTED] showing Q3 revenue of [REDACTED]

→ AI can't process it. Output is useless. Team bypasses the tool.

The tradeoff between security and productivity shouldn't exist.

Redaction breaks context. Redaction breaks accuracy. Redaction breaks adoption.

INTRODUCING PRIVACYPAL

The AI privacy layer that doesn't break your workflow.

- ✓ On-device protection — data never leaves your machine
- ✓ Works across every AI tool your team uses
- ✓ Browser extension + desktop app
- ✓ One install. Full coverage.
- ✓ Zero learning curve — runs silently in the background

Simple. Powerful. Private.

HOW IT WORKS

Privacy Twins™ — swap, don't strip.

PRIVACY TWIN • 47 SENSITIVE DATA TYPES • CONTEXTUAL SWAP

WHAT YOU TYPE

Draft the Q3 board memo for **Acme Corp**. Revenue hit **\$4.2M**; flag the variance to CFO **Sarah Chen** at **sarah.chen@acme.com** before Friday.

WHAT THE AI SEES

Draft the Q3 board memo for **Vertex Inc**. Revenue hit **\$5.1M**; flag the variance to CFO **Diana Hale** at **diana.hale@vertex.com** before Friday.

COMPANY

Acme Corp → **Vertex Inc**

REVENUE

\$4.2M → **\$5.1M**

NAME

Sarah Chen → **Diana Hale**

EMAIL

sarah.chen@... → **diana.hale@...**

✓ **Context Intact**

✓ **Zero Data on the Wire**

✓ **Restored On-Device**

✓ **100% Accurate Output**

Stop guessing. Start seeing.

Comprehensive Audit Log

- ✓ Every prompt sent to every third-party LLM — logged
- ✓ Which user. Which tool. Which data type. When.
- ✓ Identify high-risk behavior before it becomes a breach

Compliance-Ready

- ✓ Export-ready reporting for GDPR, CCPA, HIPAA, SOC 2
- ✓ Demonstrate exactly how data is handled at every step
- ✓ Real-time dashboard for security teams

USER	TOOL	DATA TYPE	STATUS
a.chen	ChatGPT	Customer PII	Protected
m.ruiz	Claude	Financial	Protected
j.park	Copilot	Source code	Protected
s.okoro	Gemini	Health data	Flagged
d.lang	Cursor	API keys	Protected

You can't govern what you can't see.

COVERAGE

Works everywhere your team uses AI.

CURSOR

Codex

BROWSER DESKTOP MAC • PC • IOS & ANDROID (SOON)

One install. Full coverage.

PRODUCT TIERS

Two products. One architecture.

	PrivacyPal AI	PrivacyPal Cloud
Browser + Desktop	✓	✓
Unlimited AI queries	✓	✓
Privacy Twins	✓	✓
Audit Log	✓	✓
Self-hosted Privacy Twins	—	✓
DSPM (database scanning)	—	✓
Data sovereignty controls	—	✓
Admin governance console	—	✓
24/7 dedicated support	—	✓

PrivacyPal AI = teams that need protection now.

PrivacyPal Cloud = enterprises that need governance at scale.

FRictionLESS DEPLOYMENT

Deploy in minutes. Not months.

Install

Activate

Protected

No complex integration

No internal LLM to build

No rearchitecting your stack

No training required

WHO USES PRIVACYPAL

Real teams. Real traction.

 **Financial Services & Accounting**

 **Healthcare & Life Sciences**

 **Legal**

 **Enterprise Technology**

 **Engineering & Product Teams**

IoM+ RECORDS SCANNED & PROTECTED

Use Cases

- Legal teams protecting privileged information in AI drafting
- Finance teams masking client data in AI analysis
- Engineering teams securing code and API keys in AI coding assistants
- HR teams protecting employee PII in AI communications

Inbound from accounting firms, MSPs, and resellers — plus marketplace inclusion requested by partners.

WHAT PEOPLE ARE SAYING

“ From everything I've been able to find, PrivacyPal looks like one of the strongest solutions on the market.

— *Partner inbound, 2026*

“ The synthetic replacement angle is a clever way to meet security folks where they are without wrecking the day-to-day UX.

— *Product Hunt community*

“ Shadow AI is a huge problem already. I operate in third-party risk management and I'm already seeing a lot of vendors not dealing with this issue.

— *Industry practitioner*

UNSOLICITED. UNPROMPTED. REAL.

THE COMPARISON

PrivacyPal vs. the alternatives.

	PrivacyPal	Traditional DLP	Cloud Proxies
Data leaves your machine	No	Yes	Yes
AI output accuracy	100%	Broken	Partial
Real-time protection	Yes	Batch/async	API-based
Desktop AI coverage	Yes	No	No
All AI tools covered	One install	Per-tool	Limited
Self-hosted option	Yes	N/A	Some
Zero learning curve	Yes	Training	Config
Vendor sees your data	No	Varies	Yes

The difference is architecture. Not policy.

SAFE AI. ANYWHERE.

Your Move.

Book a demo.

See Privacy Twins in action across your actual AI tools.

Start a pilot.

Deploy to a team in minutes. Measure the risk reduction.

Talk to us.

Enterprise pricing. Custom deployment. Your questions answered.

It starts with one conversation.
